

IP transit

About Vaioni

Since 2001 Vaioni have been delivering high performance, world class network broadband, telecoms and support services to 8000 users across the UK and Ireland. We have strategically designed and developed unique products and solutions to help businesses to success. Our portfolio of business services are delivered across our 3 datacentres, something which few competitors are able to provide at such a complex level.

Vaioni have also setup alliances with national Tier 1 carriers and peering arrangement with many ISP's. These alliances put Vaioni in a position that offers businesses, the latest technology, shortest route to the internet, lower costs and unsurpassed support on a national basis.

Vaioni's IP transit feeds offers uncontended and superior internet bandwidth from Tier 1 International transit providers Level3 and AboveNet. Our transit connectivity can offer anything from 1mb up to multiple 1Gbps ensuring high availability and low latency. Our BGP4 network is multi homed offering greater reliability with multiple GigE and 100mb connectivity to all providers and near 100% guaranteed bandwidth.

Apart from providing transit from our datacentres in London and Manchester, Vaioni can provide full BGP4 routing on behalf of you and your customers through our redundant Cisco backbone. This removes the headache of you having to buy expensive equipment and hiring senior engineers to setup your own routing platform.
