

ADSL Max

ADSL has been around for years and has revolutionised the way businesses communicate and operate online all over the world. This has also brought a great deal of broadband offers on the market which unfortunately are not necessarily tailored for business. But how will you ever know? The answer is you probably won't. Vaioni are a business class ISP, which means its broadband is designed for business only. Our ADSL MAX comes in two flavours, Standard 8000 - which is mainly for small or low users and Business 8000 - who need a more premium service. Both services are available across the UK at competitive rates.
