

Business Solutions

With the UK's largest Next Generation Aggregated Ethernet Platform and a vast Next Generation Global Aggregated Ethernet Platform, Vaioni is an independent and leading UK and Global Provider of Next Generation Ethernet Services, VPLS and PWAN solutions, encompassing world class, Hosted VoIP and security services.

We work within Carrier Wholesale, The Channel and Corporate Enterprise.

We deliver bespoke, innovative and the most extraordinary and compelling IP services to a range of partners and Corporate end users all over the UK, rest of Europe, The Americas, Africa and Asia.

We interconnect and network with 100's of global Telco carriers delivering bleeding edge, high performance, Ethernet services, IPVPN, MPLS, PWAN and VPLS solutions.

We manage hundreds of Ethernet services and solutions for some of the largest corporate and household named businesses such as, BBC, NHS, Virgin Racing, ESPA, Western Union, MTI Technology, TakeTwo International, Russell Hobbs, Post Office and Medina Dairies. We work across all vertical markets including the Finance Sector, Manufacturing, Media, Accountancy, Law and Technology.

Our resource pool of over 5000 highly qualified engineers across the globe gives your business the comfort that Vaioni can deliver a full end-to-end managed service and guarantees a 4hr fix on any hardware in over 180 countries, along with advanced 24/7 monitoring services.

Other marketing leading services from Vaioni include our Hosted VoIP Platform - Clear Voice built on Broadsoft, Managed Security Services and Unified Threat Management through FortiNet, an aggregated broadband platform made up of BT and O2, Hosted Exchange using Microsoft Exchange 2007, collocation facilities across most of the major UK and international datacentres and Managed Remote Backup Service.

Our significance to you is in our skill to design, project manage and implement an extraordinary service or solution backed with an extraordinary support and customer care service.

We run a Next Generation carrier grade ISP backbone designed specifically for high performance ethernet services which is fully resilient ensuring ultimate reliability. Our global routes deliver low latency and extraordinary performance to ensure you can reach any part of your business in any part of the world fast.

Vaioni is the only service provider who includes senior management contact details part of its SLA and a 4-hour guaranteed fix on all of its managed ethernet services as standard.

This is Vaioni and this is what makes us extraordinary in our industry.

Some of the reason why businesses pick Vaioni:

- One of the only Ethernet and Connectivity focused providers to business with massive Global Reach.
- Full Tier 2 ISP with AS35575 and fully RIPE registered.
- One of the largest reaches in the UK with access to over 180+ countries around the world.
- Full sales, presales and technical support.
- Reseller of Year Finalist 2007, ISP of the Year Nominee 2010 and Most Innovative Channel Service finalist 2010.
- Excellent reference sites and verbal reference sites on demand.
- Best SLA and price-point guarantee.
- Cutting Edge NGN delivery of services and solutions.
- Best of breed Cisco and FortiGate technologies used.
- Still servicing our first customer, with a long list of blue chip customers – click [here](#).

SME

Many ISP's are not very helpful when working with small organisations due to the restricted budgets and low volume requirements associated with smaller clients.

Here at Vaioni Group Limited we hold each and every client in the same esteem and treat all our business customers with the same respect as outlined in Vaioni's 'Corporate Citizenship & The Community' policy. No matter how unique or small a problem may be we will always endeavour to provide the best solutions to our clients by applying our undivided attention.

To survive today's fast-paced business environment organizations must be able to proactively implement measures and react to problems quickly and effectively. Vaioni deliver this level of performance throughout their projects and consultancy ensuring your business stays on course with your business strategies.

Corporate

It's hard to find a suitable ISP that can truly fulfil all the requirements of a business regardless of whether you are classed as an SME or corporate business, when it comes to connectivity, WAN and security skill, service and support. Most corporate companies have IT managers responsible for managing the overall IT infrastructure and only require external assistance for more sophisticated requirements like VPN, internet security, audits and LANs & WANs solutions and obviously connectivity.

Vaioni Group Limited has invested heavily into the way it operates and serves its clients and believes it can provide all the technical skills and service support that a corporate company requires. We also take into account that IT strategies are vital in maintaining the very best in technology and so we encourage monthly / quarterly IT strategy meetings with all of its clients. Vaioni Group Limited has the core elements in helping Corporate Companies achieve its goals for long-term success.

Super Corporate

A Super Corporate lives in a world of its own. 24-hour resilience, automated processes, high availability and cutting edge technologies are necessary in order to survive. But at the same time, long term cost savings is critical. IT directly affects a Super Corporates bottom line; a 5 minute failure in this industry can be very costly.

Vaioni Group Limited believes it has some of the best network designers and consultants to help you achieve what is believed to many companies as an over-complex network, coupled with the very best technologies, high availability and lightning data speeds.
