

## Cisco Device Management

Managing multiple Cisco devices within a network requires good resource who are knowledgeable and experienced. Even if you have covered this it still eats into your resource which costs money and creates inefficiencies. Vaioni have built its ISP infrastructure on Cisco switching, routing and firewalling, so are at least experienced and knowledgeable. Our junior technical staff are training to CCNA level and our most senior to CCIE level, however the knowledge of Cisco switching, routing and firewalling go way beyond that and provide a new generation of technical expertise that extraordinary.

As a business you can buy into this expertise and our Cisco Device Management gives you a vast resource globally on any Cisco device management you may require including hardware cover. We can guarantee 24/7 support with a guaranteed 4hr fix on any Cisco device anywhere in the world.
