

## IP Leased Line

Where Leased Lines are prohibitive or just too expensive, an IP Leased Line is a great alternative. For a low cost, you get a maximum 2mb synchronous connection and it is fully managed just like a leased line and it comes with a 99.9% SLA. Based on SDSL technology, Vaioni's IP Leased Line is a great substitute against traditional 2mb Leased Lines. We provide a Cisco router configured, a 4-hr fix and 24/7 proactive monitoring.

### Feature Spotlight
