

## Point-to-Point Circuits

Whether you have a couple of local offices in the same city or you have multiple offices across the UK, Vaioni can provide a guaranteed point-to-point (p2p) service with guaranteed low latency, jitter and packet loss with speeds ranging from 2mb upwards. Although p2p services come unmanaged, Vaioni do have a useful managed version which takes the headache out of how to configure any routing that maybe required and as standard comes with a 4hr fix too.

### Feature Spotlight

- Local, regional and national coverage
- Layer2, Ethernet delivered via Vaioni's NGN
- Managed option available for complete peace of mind
- Guaranteed low latency, jitter and packet loss
- 99.96% SLA
